The turbo II Precleaner

- Extends engine air filter life from 1 to 10 times
- Self-powered and self-cleaning
- Reduces engine wear and prolongs engine life
- Maintains effective engine breathing for maximum efficiency and power
- Minimizes costly down time
- Installs in minutes
- Tested by independent laboratories to SAE Standards

Rugged performance in all environments: the turbo II Precleaner
1. The turbo II Precleaner has specially designed blades that cause the incoming air to spin.

2. As air spins, centrifugal force spins dust, dirt, insects, rain and snow from clean air.

3. Contaminants are blown out special discharge ports by a high-velocity air powered rotor.

4. Only the purified air goes to the air filter.
